Subject: Module system e2i

1

Module system - e2i

- e2i = easy to integrate – into the architecture
– into the planning
– into the project.

2

Module system - e2i

- e2i- system consists of one controller (LON or IP) and up to 6 modules.
- All LON-components are developed in accordance to ANSI/EIA-709 resp. EN 14908 and thus guarantee interoperability with products of other manufacturers.
- At LON with the flexible module system can be realized efficiently combinations which are minimizing the quantity of LON nodes.

- Easy project planning:
 - Mutable network interface
 - Configuration and parameterisation of the installation is effected via LNS-PlugIn
 - Pre-defined application from a library
 - Combinations of function blocks

3

Module system - e2i

4

Basic -controller BC 10 RLF

- FTT, 230 V
- Basic-device for e2i modules
- Variable network- interface 34/23; 26/31
- Software modules:
 - Logic module
 - Temperature controller
 - Toggle module
 - Scene module
 - Timer module
 - Dimming- ramp- module
- LNS-PlugIn

e2i – products – controller

5

Applikations- controller AC 101 RLF

- FTT, 230 V
- Basic device for e2i- modules
- 2 bi-stable relay output 16 A
- 2 Digital output 230V
- 2 Digital input 24V
- Otherwise same functions like basic controller BC 10 RLF
- LNS-PlugIn

e2i – products – controller

6

Room control panel SmartSensor RCP 773x ULF ...

- FTT, 24 V AC/DC
- Basic device for e2i- modules
- Double mounting box
- 1...4 rockers
- Navigation knob
- Integrated temperature sensor
- Variable network- interface 26/31
- Otherwise same functions like basic-controller BC 10 RLF
- LNS-PlugIn

e2i – products – controller

7

Relay- module 6-fold ERO 6.16

- e2i- module
- 6 bi-stable relay outputs 16 A
- Switch ON/ OFF delay
- Stair case timer
- State LED's at housing

e2i – products – outputs

8

Digital output 4-fold EDO 4.230 (230V)

EDO 4.24 (24V)

- e2i- modules
- Each with 4 digital outputs, switching voltage 230V AC and respectively 24V AC
- Max. switching interval 1sec.
- Cable length max. 100m
- Kind of loads: Thermal valve drive, 3-point drive, relay modules, Magnetic valve
- State LED's at housing

e2i – products – outputs

9

Sunblind- module 2-fold EJA 2.6 AC

- e2i- module
- 2 mechanical interlocked sunblind channels for 230V motors
- Fixing point function
- Controlling of 1 channel with 24V motors
- State LED's at housing

e2i – products – outputs

10

Universal- dimming- module EDU 2.350

- e2i- module
- 2 x 350 VA or 1 x 450 VA
- For RC-/ RL loads
- Neutral conductor not necessary
- Different phase conductors at each channel can be used
- Short circuit and overload protection
- Ramp function for UP- and DOWN dimming
- Memory function
- State LED's at housing

e2i – products – outputs

11

Universal- dimm- power extension ELZ 500U

- Power boosting of EDU 2.350
- Max. power 500 W (R,C), by 10x
- Max. power 350 W (R,L), by 5x

e2i – products – outputs

12

Analogue output- module 4-fold EAO 4UI

- e2i- module
- 4 analogue current or voltage outputs
- External power supply: 24 V AC/DC
- Supply of sensors 24 V DC from module
- 0...1 V, 0...10 V
- 0...20 mA, 4...20 mA

e2i – products – outputs

13

Digital input- module 4-fold EDI 4.230 (230V)

EDI 4.24 (24V)

- e2i- module
- 4 Digital inputs 230 V or
- 4 Digital inputs 24 V
- Cable length: max. 50 m
- State LED's at housing

e2i – products – inputs

14

Analogue input- module 4-fold EAI 4UI

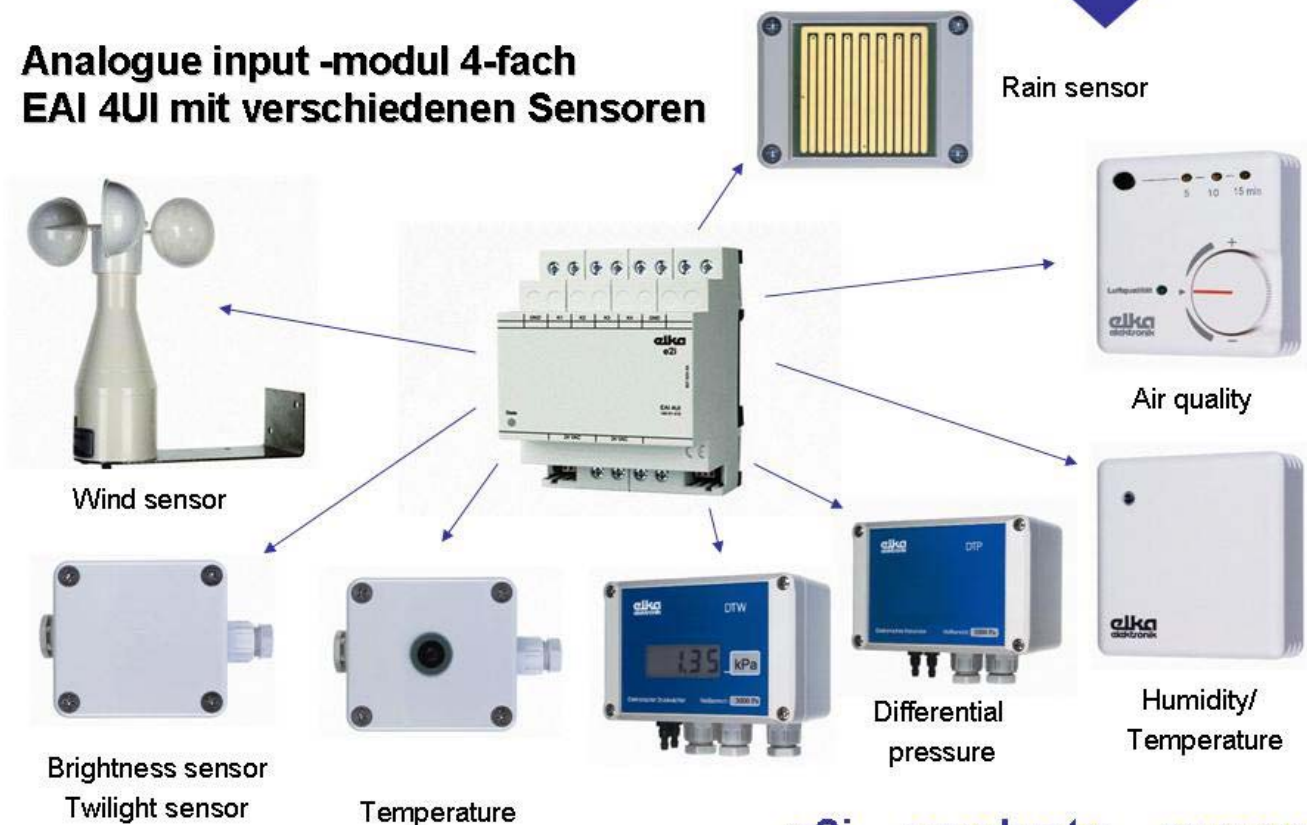

- e2i- module
- 4 analogue current or voltage inputs
- External power supply: 24 V AC/DC
- Supply of sensors with 24 V DC by module
- 0...1 V, 0...10 V
- 0...20 mA, 4...20 mA
- Detection of wire break for the current inputs

e2i – products – inputs

15

Analogue input -modul 4-fach EAI 4UI mit verschiedenen Sensoren

e2i – products – sensors

16

Operation panel SmartSensor light ITS30-RCP 8.8.LT ...

- e2i- module
- Connection via 4-core system BUS cable to LON- controller or IP- controller
- Up to 12 operation functions
- Integrated temperature sensor
- Efficient solution: one SmartSensor Basic controller connected with 3 SmartSensor light to handle up to 4 rooms

+

+

+

e2i – products – sensors

17

BUS- coupling- unit EBA 1U, EBA-G 1U

- e2i- module
- Connection via 4-core system BUS cable
- Topology: Line, tree, star
- Design- modules: BERKER, GIRA, JUNG standard push button panels

e2i – products – sensors

18

Relay combi sensor EWS-Climate

- e2i- module
- External power supply: 24 V AC/DC
- Fixed connected 6-core cable 10 m (max. 50 m)
- Wind speed
- Precipitate
- 3-channel brightness
- Twilight sensor
- DCF77- receiver
- Integrated heater till -40°C
- IP 65
- Wall- or mast mounting

e2i – products – sensors

19

Radio receiver module ERF 100 RX

- e2i- module
- Connection via 4-core system BUS cable
- Frequency: 433,42 MHz
- Radio coverage: 30 m / 100 m (open air)
- IP 20
- Log in up to 12 radio transmitter from INSTA radio range (BERKER, GIRA, JUNG)

e2i – products – sensors

20

Remote control via instafunk with ERF 100 RX

Handheld transmitter Mini
IHS 2-M

Handheld transmitter comfort
IHK 3.8-K

Wall transmitter:
- BERKER 1...4fold
- GIRA 1...3fold
- JUNG 1, 2, 4fold

Multi functions-
Transmitter IMS 4

Universal transmitter
IUS 2.230

e2i – products – sensors

21

Occupancy sensor PIR-K 360.5

- e2i- module
- 3 operation mode:
 - Mode occupancy sensor
 - Mode movement sensor
 - Alarm detector
- Detection angle 360°, 6 levels
- Coverage dependent on mounting height
 - Radius 5m by 0,8m
 - Radius 8m by 0m (ground)

e2i – Produkte – Sensoren

22

Multi sensor system LS-PIR.2

- BC10RL + e2i- modules
- Max. 6 occupancy sensors
- Max. length cable 50m (summarised)

e2i – products – sensors

23

Manual operation module EHB 5

System BUS- extension EST460E

- e2i- module
- Manual operation for all actuators at same basic module controller
- ON / OFF / ALL OFF
- Permanent or temporary manual controlled
- No configuration by software necessary

System connector EST1

e2i – products – system devices

24

Power supply SV 230-24.1 AC

SV 230- 24.1500DC

- Prim.: 230V AC
- Sec.: 24V AC
- max. output current: 1A
- Short circuit proof by thermo fuse
- Nominal input voltage 100...240V AC
- Nominal output voltage 24V DC
- Nominal output current 1,5A

e2i – products – system devices

25

LON/e2i – I/O-components

Digital output 8...24fold

Dimming actuator
2...10fold

Combination-In-Output 12fold

Digital input 6...16fold

Analogue output 8...20fold

Analogue input 8...20fold

Switching actuator
6...24fold

Blind actuator 6...16fold

Weather station

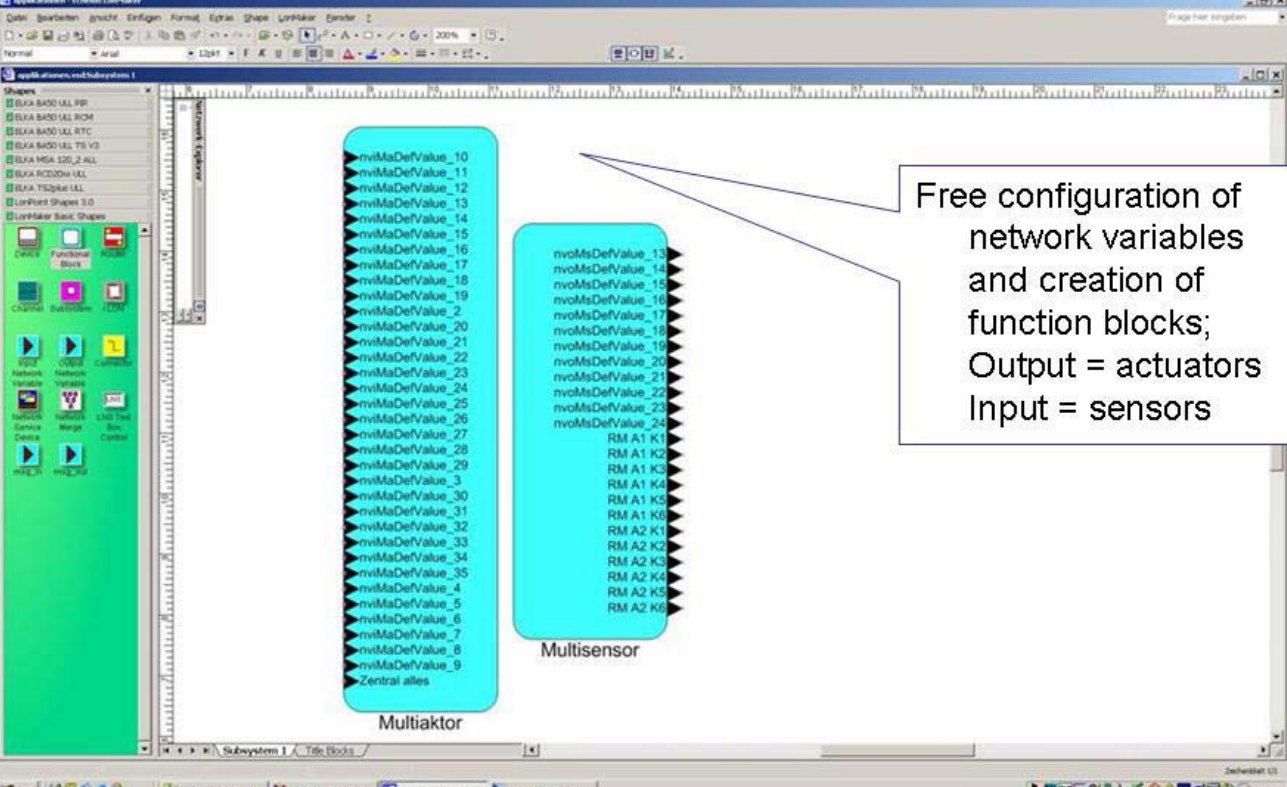

PS 24V

Radio receiver

26

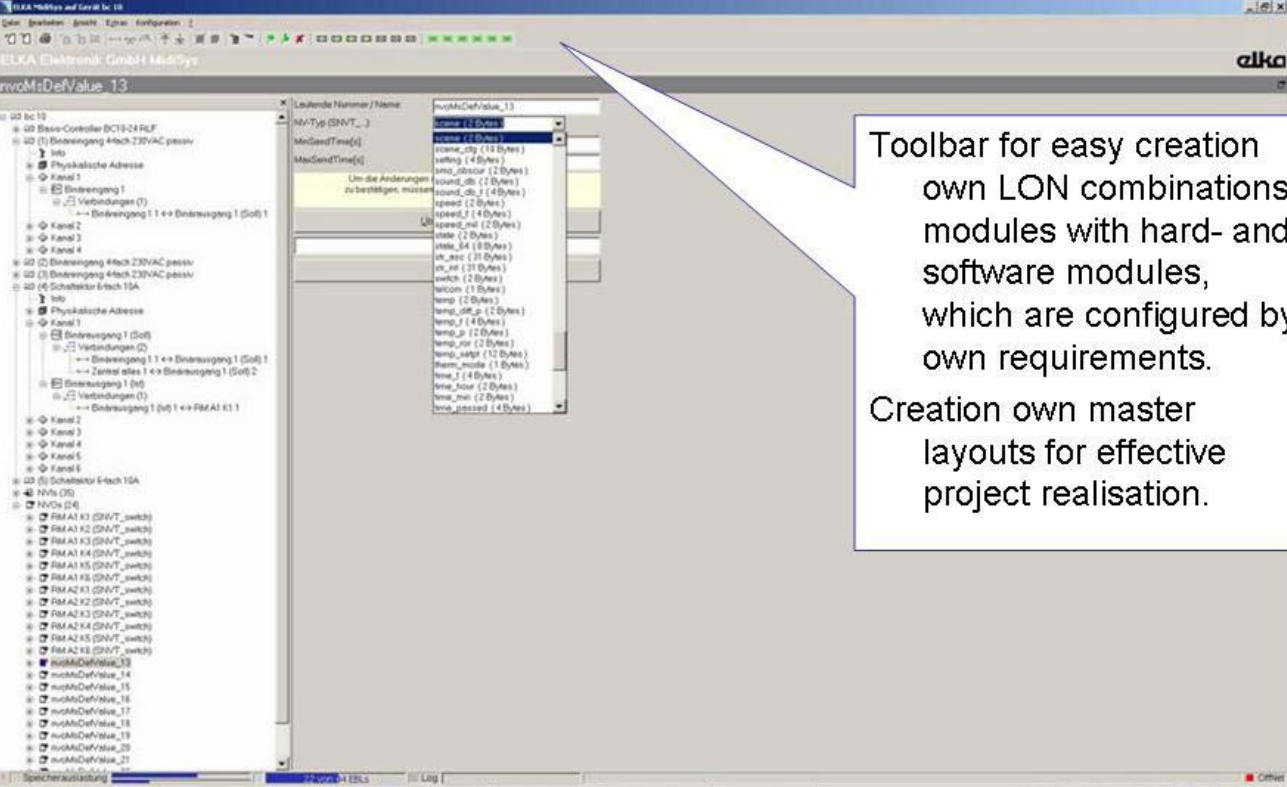

PlugIn „MidiSys“

The screenshot shows the ELKA MIDI Sys application window. On the left is a 'Shapes' palette with various LON network components. The main workspace displays a network diagram with two primary blocks: 'Multiaktor' and 'Multisensor'. The 'Multiaktor' block is a large cyan rectangle containing a list of network variables: nviMaDefValue_10 through nviMaDefValue_35, nviMaDefValue_4 through nviMaDefValue_9, and Zentral alles. The 'Multisensor' block is a smaller cyan rectangle containing a list of network variables: nvmtsDefValue_13 through nvmtsDefValue_24, and RM A1 K1 through RM A2 K6. A callout box points to the 'Multisensor' block with the text: 'Free configuration of network variables and creation of function blocks; Output = actuators Input = sensors'. The bottom status bar shows 'Subsystem 1' and 'Title Blocks'.

27

PlugIn „MidiSys“

The screenshot shows the ELKA MIDI Sys application window with the 'nvmtsDefValue_13' configuration dialog open. The dialog has a 'Laufende Nummer / Name' field and a 'NV-Typ (SNVT...)' dropdown menu. Below these are several input fields for configuration parameters. A callout box points to the configuration dialog with the text: 'Toolbar for easy creation own LON combinations modules with hard- and software modules, which are configured by own requirements. Creation own master layouts for effective project realisation.' The background shows a network diagram with various components like 'Basisschaltaktor 4-fach 230VAC passiv' and 'Schaltaktor 4-fach 15A'.

28

e2i with IP – applications- controller

AC800 RIE

The configuration is
executed with the
Tool MidiSys- IP
