

Enhance your lifestyle

Glystro - electrically operated curtain tracks by Somfy

HOME
MOTION BY

somfy®

Take it easy ...

and take control ... with help from Somfy

Your home is far more than just a place to live. It's your cocoon ... and reflects your personality and taste ...

Matching your curtains to your interior design, you add texture, colour and style. Choose to have your curtains powered by Somfy and you are adding another element – beautiful quiet and controlled movement.

If you choose full automation, you can programme your curtains to open and close at pre-set times, providing you with protection all day – even when you are not at home.

The ultimate in home comfort

COMFORT

Close your curtains at night for privacy or for warmth in the winter months.

Partially close them to offer shade on a bright day – or to dim reflection at TV viewing time.

Motorisation means you don't even have to get up from your seat to open or close your curtains – and you don't have to handle your curtains, which remain clean and fresh for longer.

Control them from anywhere in your home* using your Somfy wall switch or handset – they all work by remote control.

**Radio Technology Somfy™ (RTS) has a transmission range of 200m in free space or 20m through 2 concrete walls*

Wall mounted wireless switch

SIMPLICITY

With Radio Technology Somfy™* press one button and your curtains glide quickly open or closed.

Operate one curtain separately or several curtains at the same time – perhaps all the curtains on one side of the house, or floor by floor – the choice is yours.

Programme your curtains to open or close to your favourite intermediate position using the MY button on your remote control.

Manual operation is still possible, for example during power cuts or if you misplace your handset.

Single channel Silver remote control

CONVENIENCE

Choose a light sensor and, detecting the light outside, it will automatically open your curtains in the morning and close them at night when it gets dark.

A timer unit can be programmed to automatically open and close your curtains at your pre-set times, without you having to think about it.

RTS products also allow you to operate other motorised items such as awnings and blinds – using the same remote control.

Automating your curtains isn't a luxury – it's time saved for you to do something more enjoyable.

Wall mounted wireless timer unit with light sensor

SOMFY SOLUTIONS

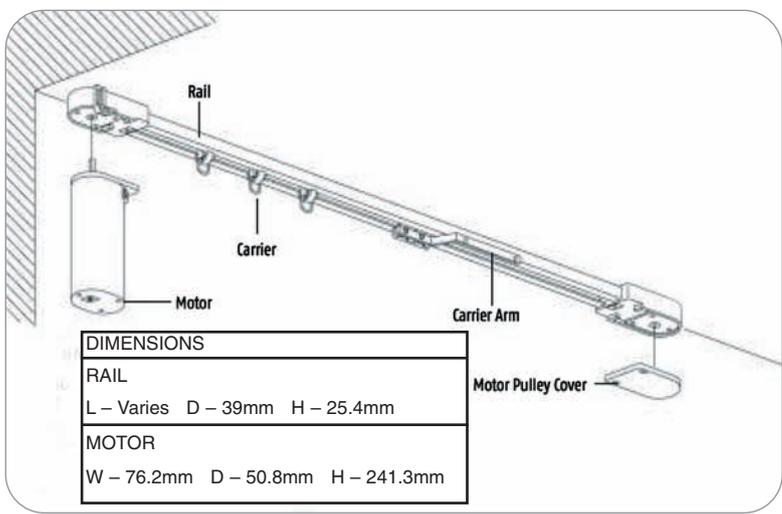

The Somfy brand offers a virtually limitless number of solutions. Somfy motors and automatic control units can be adapted to fit almost any type of blind, curtain, awning, garage door or gate, regardless of the environment, the climate, the installation conditions or the number of safety devices required.

Home Motion by Somfy puts you in control.

SOMFY RADIO CONTROL OPTIONS

Somfy can provide you with a control system to suit your lifestyle requirements. Whether you want to control your curtains yourself or leave the automatic sensor to do the work for you, Somfy has the solution.

Set up diagram of the complete system

200 metre range in open space to operate your automated controls from outside.

20 metre range through two concrete walls to operate controls wherever you may be.

Guaranteed control from wherever you are.

100% secure thanks to a tamper-resistant rolling code with 16 million combinations, making it impossible to reproduce.

0 interference risk with other systems (mobile phones, TVs, etc.) thanks to a narrow bandwidth free from other signals.

System Facts
